Product #180  
Release Date: January 2016  
Recommended Retest: January 2020

## CERTIFICATE OF ANALYSIS PERTUSSIS TOXIN Lot #180235A1A

### Contents

Each vial, when reconstituted to 500  $\mu$ l with water, contains 50  $\mu$ g of Pertussis Toxin in 0.01 M sodium phosphate, 0.05 M sodium chloride, pH 7.0. Mix gently prior to use to ensure a uniform suspension. **Do not sterile filter, as this will result in loss of material. Handle the product gently; do not vortex.**

### Concentration

A modification of the method of Bradford,<sup>1</sup> using NIST traceable bovine serum albumin as the standard, is used to determine the protein concentration.

### Purity

When examined on 16% Tricine gels in the presence of a reducing agent, this preparation migrates as five distinct bands. Densitometric analysis estimates the purity as >95%.

This product has been tested for endotoxin levels and was found to be acceptable.

### Assays

CHO Cell Assay: When examined in a CHO cell assay as described by Hewlett et al.,<sup>2</sup> the lowest concentration of toxin at which a positive response (clustered growth pattern) was obtained was 0.03 ng/ml. NOTE: Toxicity may vary by lot of toxin. Each laboratory should determine the optimum dosage for each lot in a particular application.

Adenylate Cyclase Assay: the Adenylate Cyclase activity of this lot, in the presence of 1  $\mu$ molar calmodulin, is 9 picomole cAMP/min/ $\mu$ g toxin, when assayed by the method of Wolff et al.<sup>3</sup>

### Packaging/Storage

This product is provided as an aseptically packaged lyophilized powder, sealed under vacuum. Store at 2 – 8°C prior to and following reconstitution. **DO NOT FREEZE.**

### Activation

Please note that this product is not activated. If your system requires activation, see Kaslow et al.<sup>5</sup> for suggested conditions.

Product #180, Lot #180235A1A

**Handling**

Good laboratory technique should be employed in the safe handling of this product; refer to the SDS. Wear appropriate laboratory attire including lab coat, gloves and safety glasses. Nitrile gloves are recommended when handling lyophilized material.

This product is intended for research purposes by qualified personnel. It is not intended for use in humans or as a diagnostic agent. List Biological Laboratories, Inc. is not liable for any damages resulting from the misuse or handling of this product.

**FOR RESEARCH PURPOSES ONLY. NOT FOR HUMAN USE.**
